

# Mobile Sidewalks Data Collection

CRF Strategy has partnered with RoadMetrics, a leader in collection software and AI data processing tools. Using the RoadMetrics Data Collection App, CRF Strategy can collect all your sidewalk data for you quickly, accurately and within your budget. AI tools can automatically detect cracking, trip hazards, obstructions and ADA ramp locations.

*RoadMetrics smartphone data collection app*

## About CRF Strategy

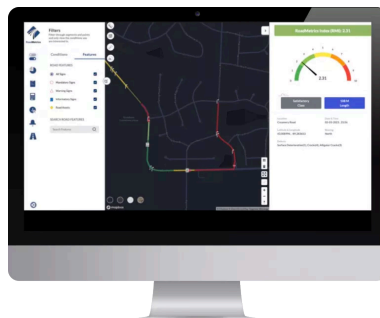

**DATA-DRIVEN ROAD CONDITION ASSESSMENTS FOR ROAD MAINTENANCE AND ASSET MANAGEMENT**

CRF Strategy brings two decades of experience in the transportation industry. We are available to assist an agency of any size to find the best and most cost-effective solutions for your budget. Whether it is data collection, data processing, pavement analysis, asset management or anything related to your infrastructure needs, CRF Strategy is a trusted partner.

### Better assessment with AI

AI tools automatically identify trip hazards

## RoadMetrics Enterprise Platform

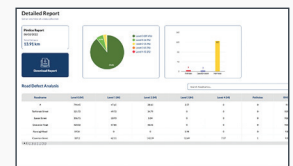

- » Web Based GIS Platform
- » Access to high resolution imagery
- » Powerful decision making tools
- » Budget calculation feature
- » Create customized audit report
- » Export data into ArcGIS and other GIS platforms

→ ADA ramps show pavement condition

→ Better sidewalk management
